

UNOTM SLOTS

S2000TM Series

UNOTM Slots

The *UNO*TM game for the *S2000* platform deals out a deck full of gaming entertainment. Based on the original and ever-popular card game, players will love the fun and fast action of this 2-coin dollar or 3-coin quarter game.

With three reels for basic game play and three more reels for the incredible bonus game, the *UNO™* slots game is destined to be number one with your players. This single payline game is available in *MegaJackpots* quarter and/or dollar linked-progressives (based on jurisdictional approval) or stand-alone models (where *MegaJackpots* linked progressives are not available).

Players lining up three *UNO™* symbols on the payline with the maximum bet wagered take home the top award. The progressive jackpot (as part of a linked progressive system) is paid in a single installment upon verification of win.

UNO™ Bonus Game

Three *UNO™* bonus symbols in any position with the maximum bet wagered initiate the *UNO™* bonus game. Pressing the SPIN button spins the three bonus reels located in the top box.

Credits are awarded based on the symbols that land on the *UNO*™ bonus game payline. Numbered cards pay face value, while additional credits are awarded for a set of three matching colors, three matching numbers, and two or three *UNO*™ symbols.

The X2 symbol, which doubles all bonus game wins; the Reverse symbol, which respins the top two reels; and the Wild symbol add even more fun to the bonus game. A conveniently located display in the top box tallies the bonus game credits.

The *UNO*™ slots game is available in an upright configuration and is manufactured for simple conversion to the *EZ Pay* Ticket System. The topper on *MegaJackpots* linked-progressive machines features a meter displaying the progressive amount. The topper, with a meter displaying the top award, is optional for stand-alone models.

Popular spinning reels and great bonus game action – it's all in the cards when you offer your players the *UNO*™ slots game!

Dollar and quarter machines may be linked to the same progressive system. The odds of winning the **GAME** progressive jackpot times the maximum wager is equivalent for all **GAME** progressive machines in a designated system. The top award win is subject to verification.

Availability of specific configurations, including the top award and reset amount for linked progressives, is based on jurisdictional approval. For information on specific game configurations available in your jurisdiction, contact your IGT or Sodak representative or visit IGT's Web site at www.IGT.com.

*Not available in all jurisdictions. Contact your local IGT representative for more information.
